

FOOD SAFETY AND QUALITY POLICY

Biorigin is committed to:

Promote the continuous improvement of processes and products through the training of people, new technologies and compliance with current legislation, to ensure the maintenance of the food safety management system.

Ensure control of critical aspects of food security, as well as efficient communication with stakeholder.

Offer products and solutions that meet the needs and requirements of customers and partners.

Promote the well-being of employees and the community, preserving health at work and living harmoniously with the environment, minimizing the impact of waste generated.

Contribute to Biorigin's business continuity, providing an adequate return on investment.

Biorigin, through its leadership, is committed to the quality and safety of food in all production stages until the delivery of the product to its customers.
